

Welcome!

About the OSF Potato Project

As you know, we're big fans of growing potatoes!

The aim of the OSF Potato Project is to:

- Record all the different potato varieties growing here in the NE of Scotland
- Create a map showing this
- Establish which varieties grow best in our local area

For more information visit:

www.oneseedforward.co.uk/home/seed-giveaways/seed-potatoes/osf-potato-project
or scan the QR code below

We need you to tell us:

- Which varieties you're growing in 2022, especially ones you didn't get from OSF
- The first half of your postcode for example AB34

Sending us the information

You can send us the information:

- using our website form - see link above
- or email if you prefer:

oneseedforward@gmail.com

Ideally we'd also like you to join the **OSF Growing Together** Facebook group to let us know how your season is going.

Are you an experienced Potato Grower?

If the answer's YES, would you like to be an **OSF Tattie Tester**? As part of the **Potato Project**, we have a limited number of special varieties that we are looking for experienced growers to test. We will give you 6 tubers of a variety of our choosing for you to plant, you just need to let us know how well the crop is growing.

To apply to become an **OSF Tattie Tester** send us an email to **oneseedforward@gmail.com**.

You must be able to **collect** these from us in Aberdeen or at one of our **Tattie Days**.
